Our inspiration? Observation. We didn't have to go far...
an old watch, take it apart, look at it from the outside
and understand it on the inside.

Something told us that it still had so much more
to give. We wanted to create something new while
respecting its analogue spirit.

And we had fun.

Before setting the time on the watch, bear in mind that the crown has three positions:

• **POSITION 0_** Position in which the watch runs normally.

• **POSITION 1_** Pull the crown until you hear the first click. In this position, you will be able to turn the hour hand.

• **POSITION 2_** Pull the crown until you hear a second click. In this position, you will be able to turn the hour and the minute hand.

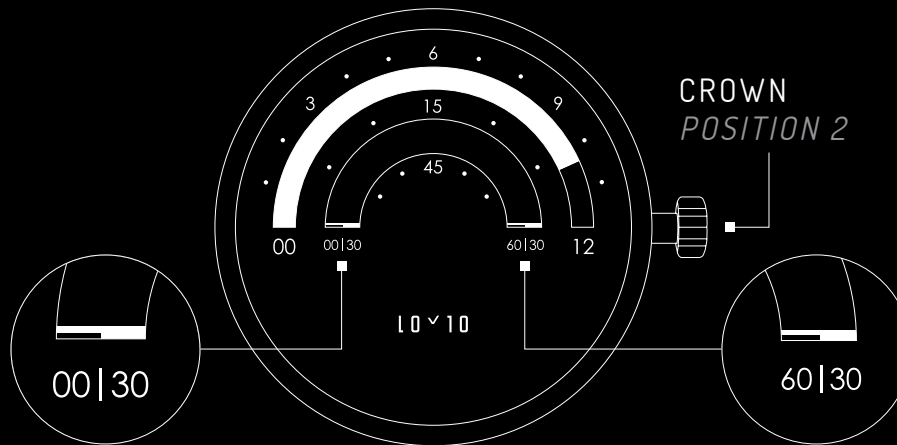

POSITION 0   *POSITION 1*   *POSITION 2*

■ HOW TO SET THE TIME

STEP 1_

• Put the crown in position 2.

• Turn the crown until the minute hand indicates 00 at the left end of the minute arc and 60 at the right end.

CROWN
POSITION 2
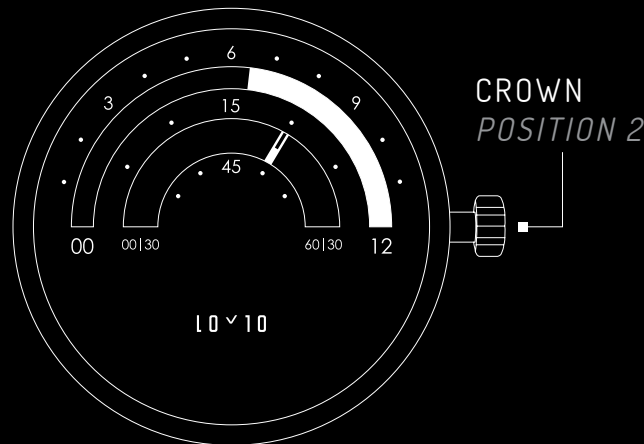

00|30

60|30

loytowatches.com

STEP 2_

- Put the crown in position 1.

- Turn the crown until the hour hand indicates the exact hour. White indicates AM hours and black indicates PM hours. For example, in this diagram we want to set the watch at 6 PM.

CROWN
POSITION 1

■ H O W T O S E T T H E T I M E

• Put the crown again in position 2.

• Turn the crown until the minute hand indicates the exact minute at which you want to set your watch. The small notch on the hand indicates the minute. For example, in this diagram we want to set the watch at minute 20.
